Minnesota State Retirement System

RFP58 (PT3195) – MS Dynamics GP Upgrade - Questions & Answers

#	QUESTION	LOCATION IN RFP	ANSWER
1	What is the number of legal entities / GP companies that live in your current Production environment?		Two (2)
2	What is the current database size of the Production instance?		40GB
3	Could you provide clarification - Update integration to internal and external systems? We assume that our scope of work is limited to GP and that changes in external systems will be out of scope.	Point number 5 in RFP	The SWIFT application does not integrate with GP. SWIFT only sends and receives FLAT FILES. Custom application will take SQL data and produce FALT FLAT. Custom Application will also take FLAT FILE and import it into GP.
4	Could you provide clarification on - Update SmartConnect and Web Services custom configuration? Is the scope limited to configuration changes?	Point number 6 in RFP	Implement any configuration changes required in the SmartConnect application and GP Web Services to work with updated GP databases.
5	Could you provide clarification on - Propose reporting tools outside MR? Which do you reports want and what reporting requirements?	Point number 7 in RFP	We have basic financial reports built in MR (balance sheet, income statement, etc.). With MR being sunset we are interested in other reporting tools to replace MR.
6	Do you plan to use SmartConnect and Smartlist builder with the latest version of GP?		Yes.
7	Which custom objects do you have and how should we estimate this?		We do not have any custom objects.
