

### Two medical statements must be provided as evidence of an illness, injury or condition.

- One statement must be completed by a licensed and practicing physician (MD).
- The second statement must be completed by another medical professional such as a licensed and practicing physician (MD), physician assistant, psychologist, nurse practitioner, chiropractor or podiatrist.

**All medical information is reviewed by the MSRS medical advisors.** Approval of a disability benefit is determined by the Executive Director of the Minnesota State Retirement System (MSRS) based on the recommendation of MSRS' medical advisors.

After approval of a disability benefit, the employee's disability status may need to be **recertified** by a medical professional **once a year for the first five years** and **once every three years thereafter** until they reach full retirement age.

A narrative statement will be accepted in lieu of this form if all questions presented are addressed, opinions are clearly stated, and it is signed and dated by a **practicing physician, physician assistant, psychologist, nurse practitioner, chiropractor, or podiatrist**.

Submit supporting clinical findings and other evidence including laboratory and diagnostic tests.

#### Definition of Total and Permanent Disability

State law defines total and permanent disability as the inability to engage in any substantial or gainful activity as a result of an ongoing or existing, medically proven physical or mental impairment that is expected to continue for at least one year.

# Physical Capacity

Please indicate your patient's physical capacity based on the definition in the **Department of Labor's Dictionary of Occupational Titles**

**Sedentary**

Sedentary work involves lifting no more than 10 pounds at a time and occasionally lifting or carrying articles like docket files, ledgers, and small tools. Although a sedentary job is defined as one which involves sitting, a certain amount of walking and standing is often necessary in carrying out job duties. Jobs are sedentary if walking and standing are required occasionally and other sedentary criteria are met.

**Light**

Light work involves lifting no more than 20 pounds at a time with frequent lifting or carrying of objects weighing up to 10 pounds. Even though the weight lifted may be very little, a job is in this category when it requires a good deal of walking or standing, or when it involves sitting most of the time with some pushing and pulling of arm or leg controls. To be considered capable of performing a full or wide range of light work, you must have the ability to do substantially all of these activities. If someone can do light work, we determine that he or she can also do sedentary work, unless there are additional limiting factors such as loss of fine dexterity or inability to sit for long periods of time.

**Medium**

Medium work involves lifting no more than 50 pounds at a time with frequent lifting or carrying of objects weighing up to 25 pounds. If someone can do medium work, we determine that he or she can also do sedentary and light work.

**Heavy**

Heavy work involves lifting no more than 100 pounds at a time with frequent lifting or carrying of objects weighing up to 50 pounds. If someone can do heavy work, we determine that he or she can also do medium, light, and sedentary work.

**Very Heavy**

Very heavy work involves lifting objects weighing more than 100 pounds at a time with frequent lifting or carrying of objects weighing 50 pounds or more. If someone can do very heavy work, we determine that he or she can also do heavy, medium, light and sedentary work.
